Profile

Experienced graduate of the Re:Coded bootcamp, proficient in crafting dynamic and accessible user experiences through a mastery of HTML, CSS, JavaScript, and React. Adept at utilizing modern web technologies such as Sass and TailwindCSS to build visually stunning and responsive interfaces. Demonstrated expertise in version control through Git, along with a solid grasp of Agile methodologies and techniques for optimizing web performance. A collaborative problem-solver with an inherent passion for creating elegant and user-centric interfaces. Excited and prepared to make meaningful contributions within high-performing web development teams.

SKILLS

Technical

- **Languages:** HTML5, CSS3, JavaScript, and Typescript, responsive web applications.
- **Technologies:** Advanced web technologies including Sass, ReactJS, TailwindCSS, Bootstrap, NextJS, and jQuery
- **Tooling:** Skilled in version control using Git & GitHub, npm, and consuming Restful APIs
- **Routing & State Management:** React-router & Redux, redux-toolkit
- **Backend Familiarity:** Familiar with backend technologies like Nodejs, Express, MongoDB, and Mongoose

Soft

- Problem-solving
- communication
- Teamwork
- Know how to learn

Experience

Frontend developer, Shoman systems

2020 – 2023 | Cairo, Egypt

- Instrumental in crafting captivating web experiences through the design, meticulous maintenance, and dynamic development of websites, harnessing an extensive skill set including HTML, CSS, JavaScript, Bootstrap, and jQuery.
- Collaborated seamlessly within a dynamic team, synergizing collective strengths to conceive and deliver visually stunning and immersive web solutions.
- Significantly contributed to the conceptualization, design, and implementation of SPC-eg.com, an exemplary showcase of my proficiency in creating visually engaging and intuitively navigable user interfaces.
- Assumed a pivotal role in ensuring seamless functionality and optimal user experiences across diverse platforms through dedicated website maintenance efforts, solidifying the reputation of Shoman Systems for delivering excellence.
- Demonstrated mastery of Bootstrap and jQuery, employing these tools strategically to expedite development workflows and heighten overall coding efficiency.
- Continuously fostered clear and open communication channels with cross-functional teams, adeptly translating project requirements into tangible and impactful web solutions that consistently exceeded expectations.
- Showcased a relentless commitment to professional growth and learning, contributing to a culture of innovation and knowledge sharing within the team.
- Garnered valuable insights from Shoman Systems' seasoned professionals, translating theoretical concepts into practical expertise that propelled my contributions to projects to new heights.
- Actively engaged in brainstorming sessions, contributing creative insights that influenced the direction of web projects and ensured alignment with the brand's identity and objectives.

Projects

Naviro

2023 – 2023

An impactful MVP app developed on the BigCommerce platform, Naviro empowers businesses with advanced features such as content strategy creation utilizing AI, post scheduling, media uploading, and dynamic business management.

- **Tech Stack:** TypeScript, Redux Toolkit, Next.js, Auth0, Tailwind CSS
- **Key Features:**
 - Engineered a robust business management app within the BigCommerce ecosystem, enabling businesses to streamline operations and content strategies.
 - Implemented an AI-driven content strategy module, allowing businesses to optimize their content creation process for maximum impact.
 - Designed an intuitive user interface with Next.js and Tailwind CSS, ensuring a seamless and visually pleasing experience for users.
 - Integrated Auth0 for secure user authentication and authorization, safeguarding sensitive business and user data.
 - Created functionalities for scheduling posts and media uploads, enhancing businesses' ability to engage with their audience effectively.
 - Developed a comprehensive suite of features catering to real-world business needs, spanning from content management to scheduling and beyond.

Foody

2023 – 2023

A comprehensive restaurant management app featuring dine-in services and home food delivery options. The app includes an admin dashboard empowering restaurant staff to manage meals, orders, reservations, and customer inquiries effectively.

- **Tech Stack:** React, React Router, Redux Toolkit, Firebase, Auth0
- **Highlights:**
 - Engineered a multifunctional restaurant app with capabilities for dine-in experiences and food delivery to users' homes.
 - Developed a streamlined admin dashboard enabling restaurant administrators to effortlessly create, edit, and delete meals, oversee orders and reservations, and interact with customers.
 - Integrated Firebase for real-time data synchronization, ensuring reliable data management and accessibility.
 - Employed React Router for seamless navigation and enhanced user experience throughout the app.

Wanderly

03/2023 – 04/2023

An impressive travel web app featuring an intuitive UI for seamless hotel and flight searches, offering user-friendly features such as recent search history and favorite destinations.

- **Tech Stack:** React, Redux Toolkit, React Router DOM, Tailwind CSS, Auth0, React Map GL
- **Highlights:**
 - Designed and developed a user-centric travel web app from scratch using React and modern technologies.
 - Integrated Auth0 for secure user authentication and authorization, prioritizing data privacy.
 - Constructed a personalized "Favorite Destinations" feature, enabling users to curate a list of preferred locations.
 - Designed a "Recent Searches" feature, providing quick access to the most recent searches and enhancing user convenience.

Education

Business Administration, Ain Shams University

09/2016 – 06/2020
