PROGRAMMING EXPERTISE

Majesto Food

10/2022 – 11/2022

This is a ReactJS app, an online food ordering service. The website offers a wide range of food options from various cuisines and allows customers to add their meals to the cart and modify them and ability to order their food online. The app has some simple validation to demonstrate more complex logic but is easy to use, making it a convenient and secure way to enjoy delicious food. Built with

- ReactJS
- Complex logic
- Firebase database
- GitHub pages

Project: Expenses-follower

09/2022 – 09/2022

This is a web-based application I created called Expenses Follower. It is an app that allows users to track, analyze, and visualize their financial data. The application features a user-friendly interface allowing users to easily add their expenses in an organized way. It also provides a comprehensive overview of expenses, allowing users to gain insights into their spending habits. Additionally, it generates charts and graphs to help users visualize and understand their expenses better.

- Two weeks of development using React.JS, and CSS.
- The application works on various devices.
- I followed agile methodologies to achieve maximum outcomes.

Project: Bondi

05/2022 – 05/2022

This is a portfolio website showcasing my web development projects. It features a range of interactive designs and features, and my experience with HTML, CSS, JavaScript, and other web technologies. It is a great way to demonstrate my knowledge and skills, as well as my creative approach to web development.

- App developed by HTML, CSS, and Javascript.
- View the optimal layout for the site depending on their device's screen size.
- The app is designed to show skills in using flexbox combined with the grid system and javascript.

Project: YelpCamp

01/2022 – 01/2022

Yelp-Campground is an interactive website that provides users with a comprehensive guide to camping sites across the country. It includes detailed descriptions of each site, user ratings, photos, and more. It also provides helpful tips for camping and travel, as well as a forum for users to connect with fellow campers. With Yelp-Campground, users can easily plan their next camping adventure with confidence.

- The app was developed in 4 weeks by HTML, CSS, and Javascript for the FE.
- Node.JS, Express, MongoDB, npm packages, and Heroku to deploy and run the app.
- I used passportJS for auth, and I followed MVC patterns for implementation.
